 <p><b>Cyber Security Specialist</b> Protects, organizations, systems and data by identifying, mitigating and responding to security threats.</p>	 <p><b>Information Technology Analyst</b> Analyzes IT systems, identifies needs and recommends technology solutions.</p>	 <p><b>System Engineer</b> Designs, integrates and manages complex systems and networks to ensure optimal performance.</p>
 <p><b>Digital Product Manager</b> Oversees the strategy, development, delivery and success of digital products across teams.</p>	 <p><b>IT Project Manager</b> Oversees project planning, execution and delivery within scope.</p>	 <p><b>Consultant</b> Advises on digital strategies, transformation initiatives and practices.</p>

# ITIL FOUNDATION: THE FIRST STEP ON YOUR ITIL PROFESSIONAL PATHWAY

ITIL Foundation is the essential starting point for IT professionals embarking on their journey to mastering IT Service Management (ITSM). This globally recognized certification equips you with the foundational knowledge needed to understand key concepts, principles, and practices of ITSM, setting you up for success in a dynamic and evolving tech landscape.

Both ITIL v3 Foundation and ITIL 4 Foundation serve as prerequisites to advance along the ITIL certification path. These certifications provide the required grounding to move forward into specialized modules and advanced designations like ITIL 4 Practice Manager, ITIL 4 Managing Professional, ITIL 4 Strategic Leader, and ultimately, ITIL 4 Master.

The ITIL Foundation certification is more than just an entry point - it's a bridge to career-defining opportunities. Whether you aim to manage IT assets, drive stakeholder value, or lead strategic initiatives, ITIL Foundation lays the groundwork to help you thrive.

*Wanna be a*  
*This is your* **IT SERVICE MANAGER ?  
CERTIFICATION PATH**

# ITIL 4 CERTIFICATIONS 1/3

## ITIL Foundation

This essential ITIL module introduces you to key concepts at the start of your ITIL 4 journey, providing a solid foundation for understanding IT service management and its core elements.

## ITIL 4 Specialist: Create, Deliver and Support

Enhance your skills in designing, delivering and managing digital products and services. Upgrade your strategy, manage issues effectively and foster a culture of continuous improvement.

## ITIL 4 Strategist: Direct, Plan and Improve

Learn to optimize workflows, manage organizational change and align business and IT strategies, while promoting collaboration and continuous improvement.

## ITIL 4 Specialist: Drive Stakeholder Value

Gain the skills you need to enhance stakeholder relationships and optimize the user experience through effective value co-creation.

## ITIL 4 Specialist: High-Velocity IT

Learn practical skills to adapt service management practices to the modern organization's dynamic, high-velocity environment. Build resilient systems and improve service quality and speed.

## ITIL 4 Leader: Digital and IT Strategy

Improve your digital leadership skills by aligning digital strategies with broader business objectives, discover how to navigate VUCA environments, and effectively respond to disruptions.

## ITIL 4 Specialist: Monitor, Support and Fulfill

A combined module that covers the key concepts of 5 ITIL Practices: Incident Management, Service Desk, Service Request Management, Monitoring and Event Management and Problem Management.

## ITIL 4 Practitioner: Incident Management

Learn about the processes and activities of the Incident Management practice, and their roles within the service value chain.

## ITIL 4 Practitioner: Service Desk

Learn how to improve user and customer experience, as well as the overall success of your service relationships.

## ITIL 4 Practitioner: Problem Management

Receive practical guidance on the processes and activities of Problem Management, including their roles in the service value chain.

## ITIL 4 Practitioner: Service Request Management

Learn to deliver an agreed quality of service by handling all predefined, user-initiated service requests in an effective and user-friendly manner.

## ITIL 4 Practitioner: Monitoring and Event Management

Learn how to systematically observe services and service components, recording, reporting, and responding to selected changes of state identified as events.

# ITIL 4 CERTIFICATIONS 2/3

## ITIL 4 Specialist: Plan, Implement and Control

A combined module that covers the key concepts of 5 key ITIL practices: Change Enablement, Deployment Management, Release Management, Service Configuration Management, and IT Asset Management.

## ITIL 4 Practitioner: Change Enablement

Learn to maximize the number of successful service and product changes by ensuring that risks have been accurately assessed, authorizing changes, and managing change schedules.

## ITIL 4 Practitioner: Deployment Management

Learn how to move new or changed hardware, software, documentation, processes, or any other component to live environments, and how to deploy components to other environments for testing or staging.

## ITIL 4 Practitioner: Release Management

Learn best practices for making new and changed services available for use, in line with your organization's policies and any agreements between the organization and its service consumers.

## ITIL 4 Practitioner: Service Configuration Management

Learn to provide accurate and reliable information about the configuration of services and configuration support items when and where it is needed.

## ITIL 4 Practitioner: IT Asset Management

Learn how to plan and manage the full lifecycle of all IT assets to help your organisation maximize value, control costs, and manage risks related to the purchase, use, and disposal of those assets.

## ITIL 4 Specialist: Collaborate, Assure and Improve

A combined module that covers the key concepts of 5 ITIL Practices: Relationship Management, Supplier Management, Service Level Management, Continual Improvement and Information Security Management.

## ITIL 4 Practitioner: Relationship Management

The purpose of this module is to establish how to nurture the links between the organisation and its stakeholders at strategic and tactical levels.

## ITIL 4 Practitioner: Supplier Management

The purpose of this module is to ensure that the organization's suppliers and their performances are managed appropriately to support the seamless provision of quality products and services.

## ITIL 4 Practitioner: Service Level Management

The purpose of this module is to provide best practice guidance on how to set clear, business-based targets for service utility, warranty and experience.

## ITIL 4 Practitioner: Continual Improvement

Learn to deliver an agreed quality of service by handling all predefined, user-initiated service requests in an effective and user-friendly manner.

## ITIL 4 Practitioner: Information Security Management

The purpose of this module is to provide best practice guidance on how to set clear, business-based targets for service utility, warranty and experience.

# ITIL 4 CERTIFICATIONS 3/3

## ITIL 4 Specialist: Sustainability in Digital and IT

Explore strategies for tackling sustainability challenges in digital and IT strategies, operations, and tactics.

## ITIL 4 Specialist: Acquiring and Managing Cloud Services

Learn how to improve user and customer experience, as well as the overall success of your service relationships.

## ITIL 4 Specialist: Business Relationship Management

Become an expert in building relationships between service providers, consumer organizations, and stakeholders. (Single certification option available.)

## ITIL 4 Specialist: IT Asset Management

Promote responsible financial control and support decision making on the purchase, re-use, retirement and disposal of IT assets.
